Environment Overview

Your Learner Lab environment is pre-configured for primary exploration of AWS services.

The environment is ephemeral: Once the lesson time is over, the lesson ends, or if the lesson ends early, all data that was created in the AWS account will be removed. If you want to save or export the contents, the lesson ends, and the lesson time has ended, or if you want to start over, you can create a new lesson session. Any data that was created in the previous lesson session will be removed when a new lesson session is created.

Instructions for accessing the lesson environment are provided in the lesson instructions. Typically, you will start a lesson by clicking the **Start Lesson** button, waiting for the lesson to be ready, and then clicking the **Open Lesson** button.

IMPORTANT: Always sign out of lessons by using the interface above. Whenever you have an active lesson, the lesson resources are being provisioned and you are being charged for the time that the lesson is active. If you forget to sign out of a lesson, you will be charged for the time that the lesson is active. If you accidentally forget to sign out, you can log back in and sign out of the lesson when finished. **If you accidentally leave the lesson active and the lesson ends or expires, the lesson resources will be removed**. Contact your instructor if you forget to sign out and accidentally leave your lesson active.

Environment Navigation

Use **Cloud9** from the dropdown menu to access the lesson environment at any time.

Use **AWS Console** from the dropdown menu to access the AWS Management Console.

Do not change the lesson time zone or preferred AWS Region from the UTC-8 PST time zone and Oregon (us-west-2) Region.

Use the **Start Lesson** button to start a lesson. Lesson resources will be provisioned and the lesson will start. Lesson resources will be removed when the lesson ends or when you sign out of a lesson. Lesson resources will be removed if you do not sign out of a lesson and the lesson time has ended or if the lesson time has expired. Contact your instructor if you forget to sign out of a lesson and accidentally leave your lesson active.

IMPORTANT: Always sign out of lessons by using the interface above. Whenever you have an active lesson, the lesson resources are being provisioned and you are being charged for the time that the lesson is active. If you forget to sign out of a lesson, you will be charged for the time that the lesson is active. If you accidentally forget to sign out, you can log back in and sign out of the lesson when finished. **If you accidentally leave the lesson active and the lesson ends or expires, the lesson resources will be removed**. Contact your instructor if you forget to sign out and accidentally leave your lesson active.

Accessing the AWS Management Console

1. At the top of the lesson instructions, choose **Start Lesson**.
   - Wait for the lesson to complete lesson resource initialization.
   - Wait for lesson details to be ready.
2. Choose **Open Console** to access the AWS Management Console.
   - Choose **Open Console** in the lesson instructions.
   - Choose **AWS Console** from the dropdown menu.
   - Choose **Console** from the dropdown menu.
   - Wait for the console to load.
   - Choose **Resume** if the console is paused.
   - Choose **Dismiss** if a tour is shown.
   - Choose **Dismiss** if a tour is shown.
   - Choose **Dismiss** if a tour is shown.
3. Choose **Services** from the top of the console.
4. Choose **Cloud9** from the dropdown menu.
   - Type **Cloud9** into the search bar.
   - Choose **Cloud9** from the search results.
   - Wait for the Cloud9 environment to load.
   - Choose **Open IDE** if the Cloud9 environment is not open.
   - Choose **Open IDE** if the Cloud9 environment is not open.
   - Choose **Open IDE** if the Cloud9 environment is not open.
   - Wait for the Cloud9 environment to load.
   - Wait for the Cloud9 environment to load.
   - Wait for the Cloud9 environment to load
